

## P4 TRANSCRIPT – JUPYTER NOTEBOOK

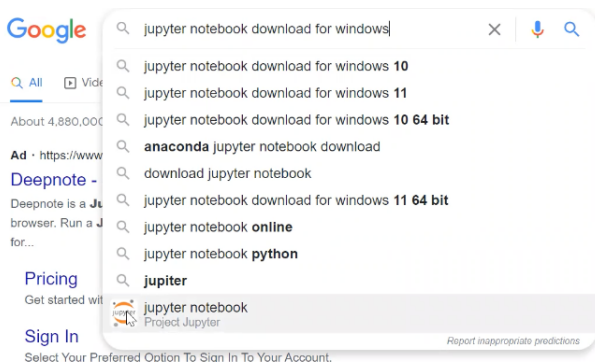

00:01

I'm going to search Jupyter notebook on Google now, it should be a Jupyter Notebook download *clicks on the google suggestion* and there's a list of links, I'm going to choose the first one. *Clicks on the first link (official page)*

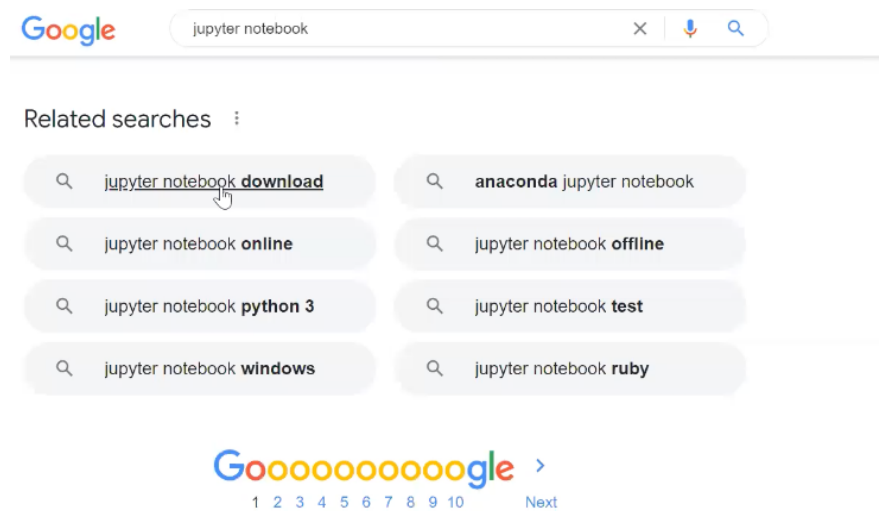

00:44

I didn't find any useful links here, so I go back and maybe choose the first one for Windows *goes back to google and add "for windows" on google search*. On this is only for Python, but I want to download the whole thing so I go back again. Since there's a symbol here I choose the last one maybe

2:02 *Goes to the end of the page again and clicks on “anaconda jupyter notebook” option*

The first word is quite familiar so I choose Anaconda Jupyter notebook.

02:11

**Observer:** Are you familiar with so

02:13

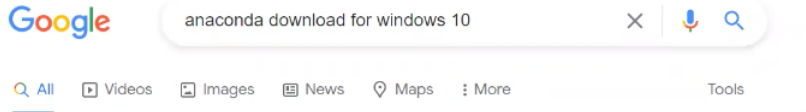

Yes, I downloaded it before

02:16

**Observer:** Did you download it before the session?

No, it was in my previous laptop for previous study.

I saw that step and retype again choose the first link is download. *Goes back to google search and types “anaconda download for windows 10”, clicks on the second link*

### Anaconda Installers

Anaconda Installers. [Windows](#). Python 3.9. 64-Bit Graphical Installer (510 MB) · 32-Bit Graphical Installer (404 MB).

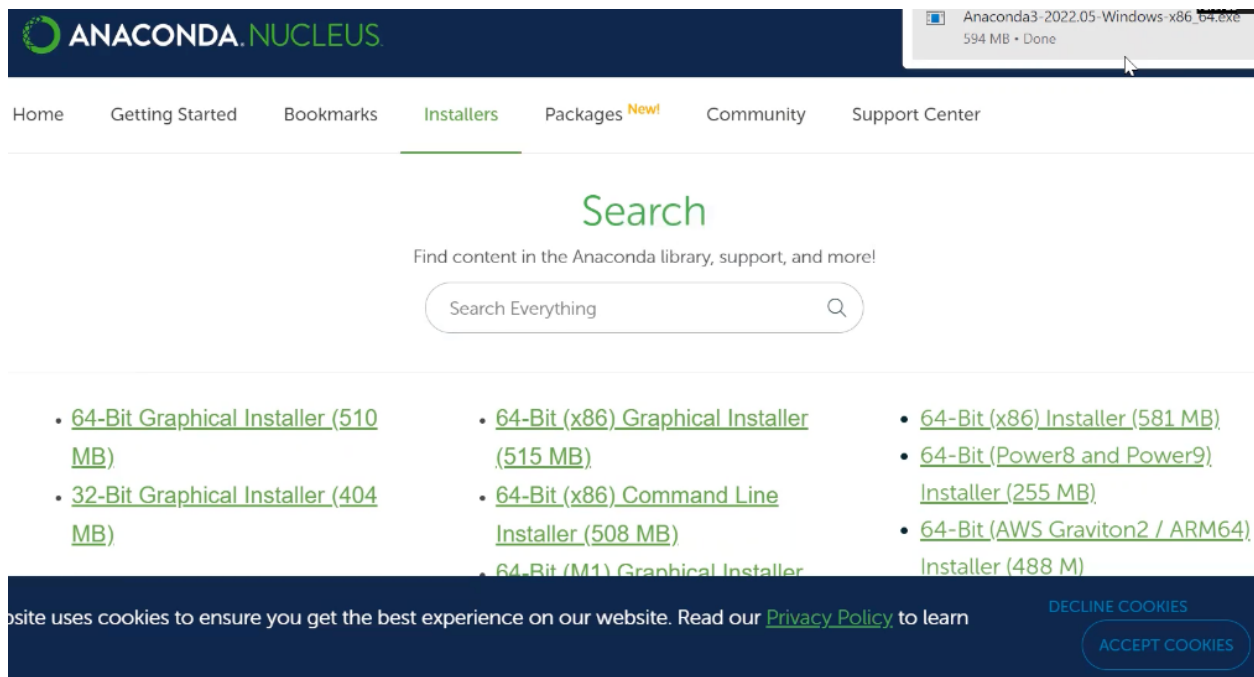

03:22

**Observer:** When you installed it before we're using Windows or was it a another operating system?

03:28

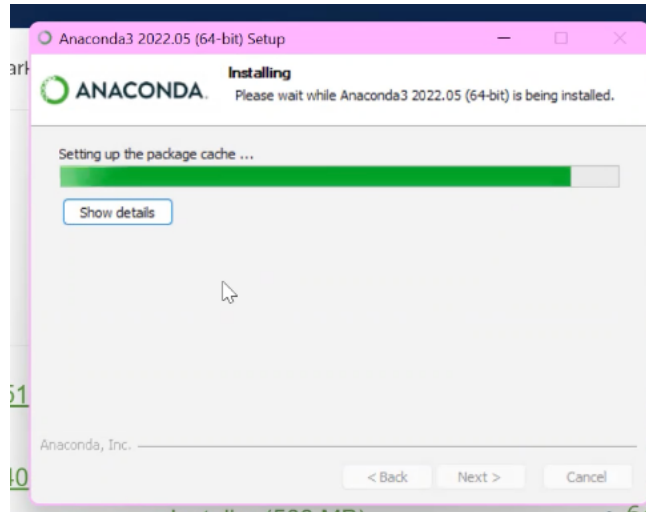

Windows

***Clicks on the windows option and download a .exe file***

04:11

Now I'm just setting up

07:26

**Observer:** Did this happen the last time you installed the tool? just to like just keep you know, taking this long, is this normal?

07:36

Yeah, I think so. Always bet on the internet speed. I'm sorry. It's our internet speed.

10:50

**Observer:** Do you remember like how long did it take to install it the last time you did it?

10:59

within 15 minutes maybe

11:04

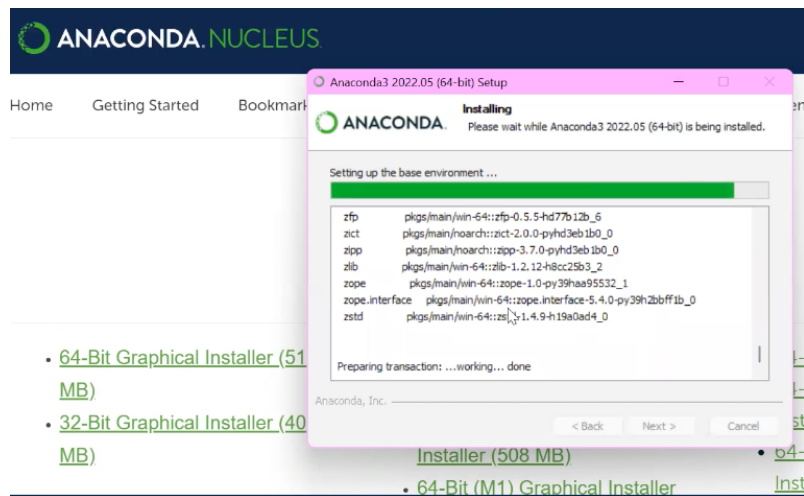

**Observer:** this window specifically

Yeah.

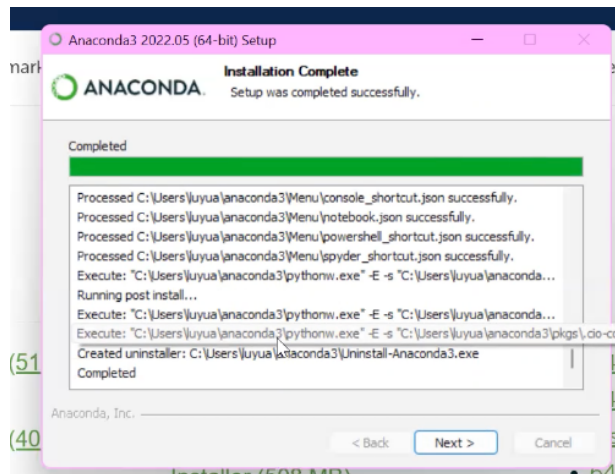

11:17

Did you click on something?

Yes, I clicked on "show details"

25:13

Finished.

**Observer:** How do you know this tool is like working

25:47

if I can open the app and then there's a homepage it shows our pattern or our studio of that click in a box

25:55

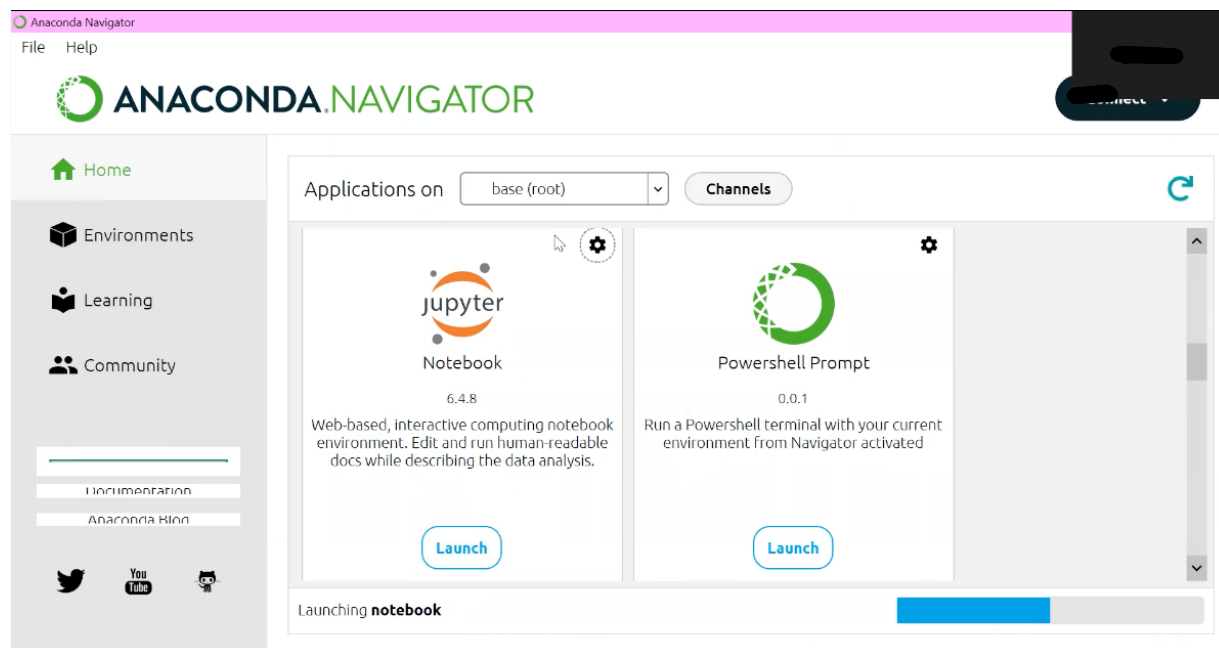

**Observer:** Can you do that?

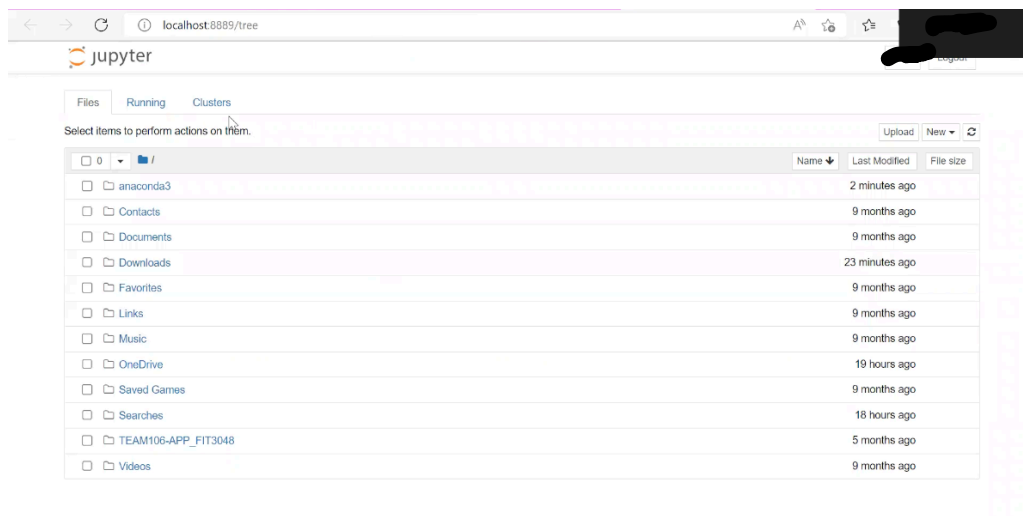

yeah *opens the command prompt*

**Observer:** Is this Windows 11?

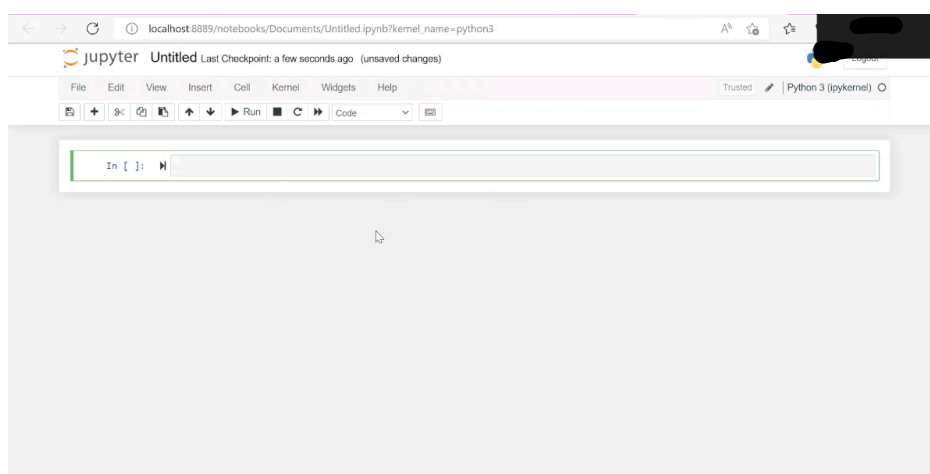

26:42

Yes. It says "it says initialising". I find Jupiter notebook and I click on "Launch".

and then we need to, we can choose a new “Python 3” and then we can start coding here

27:50

**Observer:** okay. I’m gonna ask you those few questions. Did you have any challenges during the installation process?

28:10

Yes, sometimes the Anaconda version may not be compatible with my laptop system. And then maybe I need to update the system or find the correct version and match the system.

28:31

**Observer:** And so you think this happens specifically because you're using because Windows 11 is like fairly new, right? Do you think this is the problem?

28:45

Yes, maybe. Maybe I need to choose the latest version for Anaconda.

29:00

**Observer:** What did you do to overcome this challenge? If you did something you just like had to be more careful about the version that you installed?

29:12

Yes. And I need to update the system, the laptop system. Okay,

29:22

**Observer:** What support/information could have made the installation process easier? Do you think that this is like a information lack of information problem on their website?

Maybe the information because usually when I search on Google I usually choose the first one like the topic, which is more obvious, with a key word, like download for Windows. And then if this kind of information is more common, it will be easier for us to download Anaconda.

30:37

**Observer:** What challenges have you encountered installing software development tools in the past?

30:52

There's one time I use my mother's laptop by the laptop is locked by her company for security purpose, and then I couldn't download Java composer. It took me a few days and now so as my children they also have the problem and then I bought a new laptop in JB Hi Fi.

**Observer:** Oh, you has to buy a new laptop?

Yes, because of the system

31:28

**Observer:** but it was like specifically because your mother's laptop was like locked by the company. It was like a company laptop. Yes, it was the issue.

31:39

Yeah. For safety purpose movie.
